ShelbyCounty Schools

Health Science Program

Changing healthcare one student at a time

Health Sciences

Classes are offered to all Shelby County School students beginning in the 11th grade. All students will come to the College and Career Center each day to take their scheduled class. Students gain extensive knowledge in various health related classes:

- Foundations of Health Science
- Therapeutic Services
- Emergency Services
- Medical Terminology
- Health Science Internship
- EMT– Basic

Health Sciences is a two year program designed to assist students interested in any health related field with career planning and college preparedness. Students gain real skills and participate in clinical experiences at local hospitals and rescue services. We are preparing 21st century learners to be college and career ready upon graduation. Health Science allows students to determine if a career in the medical field is right for them while they are in high school instead of while they are in college.

College and Career Ready

Credentials that students can earn while in the Health Science Program.

- EMT– Basic
- PCT– Patient Care Technicians
- BLS Instructor
- Pharmacy Technician—Pharm Tech
- OSHA
- BLS
- CPR/ First Aid/ AED

Hands-on Learning
