

Shelby County Schools

Bring Your Own Device (BYOD) Policy

The goal of the BYOD program is to expand learning opportunities for students. However, parents and students should know that bringing a personal device to school is a privilege, not a right. All content accessed on the device while at school must be appropriate for the school environment. Students are expected to:

- Use their device responsibly and keep it secure
- Use their device for educational purposes
- Respect the property of others
- Follow all rules related to BYOD
- Know how to use their device and how to adjust its settings
- Exhibit good digital citizenship and safe online practices

Permitted Devices

- Laptops, netbooks, Chromebooks
- Tablets (Android, Apple, Windows)
- Ebook Readers
- Smartphones (only if permitted by school)

Rules and Conditions

BYOD permissions can be temporarily or permanently revoked when warranted. Situations that could cause this privilege to be suspended or revoked include, but are not limited to:

- Misbehavior of individual student(s), whether or not technology is involved
- Adverse effect on school culture (cyberbullying, distraction from learning, etc.)
- Network conditions
- Special events such as online testing periods
- Changes in technology policy and procedures

In addition to rules found in the Code of Conduct and the Technology Acceptable Use Policy, the following rules apply to BYOD:

Where & When

1. Students may only use their device in the classroom when instructed to do so by their teacher.
2. Students may not use their device for texting personal messages or updating personal online accounts during school hours with the exception of communicating with parent/guardian in emergency situations.
3. Students may not use their device in common areas, such as hallways and the cafeteria, unless the individual school permits this use.
4. Students may only use their device in the library/media center with the permission of the media specialist.
5. Students may not use their device while on school buses (Transportation Policy in Code of Conduct).

Storage and Theft or Loss of Device

1. Students should not ask teachers or staff to 'hold onto' or store their device.
2. Administrators should not be asked to retrieve devices left in school lockers.
3. The school/District will not be held financially responsible for lost or stolen devices, nor are school administrators responsible for conducting searches for lost/stolen devices.

Network, Internet Access, Electrical Charging

1. Students should always use the school's wireless BYOD network, not personal data plans or other wireless networks, in order to access the Internet. (BYOD privileges may be revoked for students found to be visiting websites which are blocked by the District's filter.)
2. Students should bring devices fully charged to school. Access to electrical outlets for charging should not be expected.

Shelby County Schools

Bring Your Own Device (BYOD) Policy

Disclaimers and Data Charges

1. Students are herein instructed to use the school's BYOD network and not personal data plans to access the Internet when using their devices at school. Students or their parents are responsible for all data charges that a student's device may incur due to use in school. The school will not be responsible regardless of whether the student used their device for a lesson as using personal devices is never mandatory.
2. Teachers may use certain mobile applications which involve students sending texts in order to respond to classroom questions. Students are not required to participate in these activities and should not participate using their personal device if their service plan does not include a texting plan that will accommodate such use without additional charges.
3. No guarantee is made that the school's wireless network will always be available. Network outages may occur without notice. In addition, no quality of wireless signal is promised. Signal strength may vary depending on the location in the school and the number of devices simultaneously connecting to the network.

Content and Apps

1. Students may be asked to download free apps that teachers use for classroom activities. If parents do not wish their child to download these apps, they should inform their student not to do so without their prior permission.
2. Students may not store inappropriate content on the device that is brought to school.
3. Use of annoyizing apps, such as *YikYak* and others, are discouraged and prohibited during school hours.
4. Students should ensure that their device does not contain any software or apps designed to access illegal or inappropriate file sharing sites.

Damage/Troubleshoot/Inspection

1. The school/District will not be held responsible for any damage or data loss, including losses resulting from connecting devices to the school's wireless network or power outlets.
2. School/District staff, including Technology staff, will not configure, troubleshoot, or repair student devices.
3. School officials may read, examine, or inspect the contents of any personal device upon reasonable suspicion that the contents or recent utilization of the device contains evidence of a violation of these or other rules and policies, as well as any local, state, or federal laws.

I have read, understand, and agree to abide by these rules and conditions. I understand that bringing my device is a privilege, not a right; and that this privilege can be revoked for violations of these rules or any other Code of Conduct violation.
